FF-1000

Bill Counter with Counterfeit Detection

The **FF-1000** by **UVeritech** is a highly efficient currency counter utilizing counterfeit detection technology. Counting by denomination, recognizing security features, and high-speed accuracy are just a few of the valuable features of this new product. Pre-programmed functions also allow the user to set automatic tasks that speed usage and assist in troubleshooting.

- ▶ High-Speed, up to 1,000 bills per minute
- ▶ Counts total quantity of banknotes
- ▶ Simultaneously verifies Metallic/Magnetic, ultra-violet, paper width and optical transparency features
- ▶ Sounds an alarm and stops counting when suspicious bill is detected
- ▶ Digital display of total currency counted
- ▶ Double, chained, and half-note detection
- ▶ Utilizes “fuzzy algorithm” for improved reliability and accuracy
- ▶ Automatic starting, clearing, memory, and self-diagnosis functions
